Dr. C. C. Little, Director
Jackson Memorial Laboratory
Bar Harbor, Maine

Dear Dr. Little:

I would appreciate the favor of having my name on the mailing list for publications from your laboratory. I would be especially interested to see work relating to the genetics of somatic cells, i.e., histocompatibility and its mutations, and the like. If anyone would care for an exchange, I would be pleased to reciprocate.

I had meant to write to you anyhow on another matter. There is a good chance that Mrs. Lederberg and I will find ourselves in your vicinity around the middle of August. We would like very much to visit the laboratory for a day or two if that is conveniently possible, but have no idea of the local accommodations. If reservations would be desirable, or if such a casual visit would entail any inconvenience or conflict on your part, please let me know.

Yours sincerely,

Joshua Lederberg
